Recpath Detailed Information:

Dillon Reservoir Recpath Elevation Profile

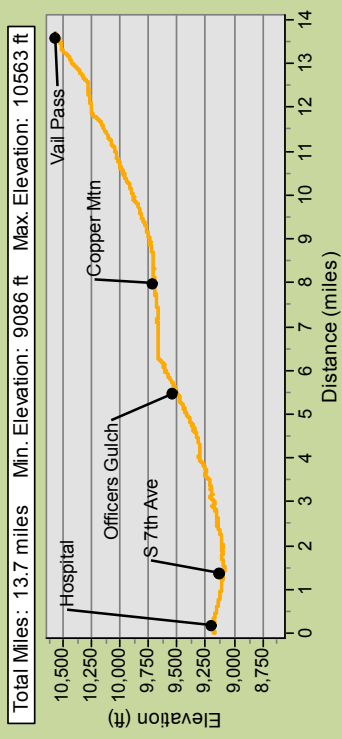

The most popular 6.5 mile section between the Frisco and Dillon marinas passes through small rolling hills then continues another 3.5 miles along the reservoir, providing breathtaking views of the reservoir and surrounding mountain ranges. Near Swan Mountain Road, the path begins a gradual climb before entering a strenuous 3 mile climb, including numerous switchbacks, up to Sapphire Point. From Sapphire Point to Summit High School, descending bike riders share the vehicle lane. A pedestrian/bike lane is located on the eastern shoulder of Swan Mountain Road for 2 miles for uphill riders. The Recpath has several moderate hills between the high school and Summit Medical Center, crossing Highway 9 into the Frisco Adventure Park and to the Frisco Marina. The full 18.5 mile loop is strenuous and is not recommend for young children or bike trailers, due to shared use of the vehicle lane on Swan Mountain Road.

Snake River Recpath Elevation Profile

This easy section contains a gradual ascent east of Swan Mountain Road towards Keystone Resort. Enjoy the scenery along the Snake River, and be sure to remain on the path through the golf course. For information on pathways within Keystone, pick up a copy of Keystone's trail map.

Tenmile Recpath / Vail Pass Elevation Profile

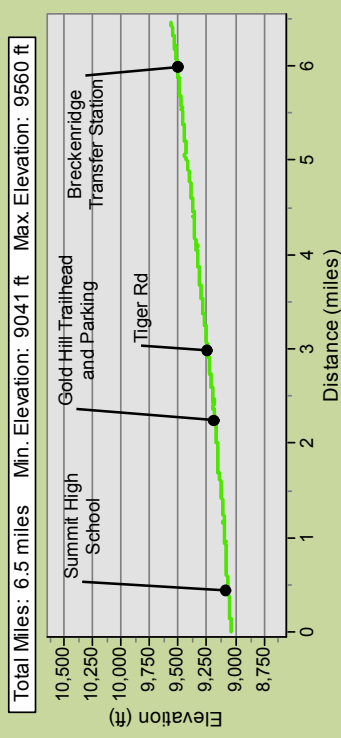

This moderate climb ascends Tenmile Canyon from Frisco to Copper Mountain, becoming more strenuous as it continues to Vail Pass. Be aware of other users, and keep speeds under control, especially in areas with limited site distances.

Lower Blue Recpath Elevation Profile

This moderate section descends from the intersection with the Dillon Reservoir Recpath down a series of switchbacks into Silverthorne. Users meander on the path through Silverthorne and along the Blue River. Be prepared for a strenuous set of switchbacks when heading uphill from Silverthorne to Dillon Reservoir.

Upper Blue Recpath Elevation Profile

This section climbs gradually from Frisco to Breckenridge, following sections of the Blue River and Highway 9, providing outstanding views of the Tenmile Range.
